DETAILED OFFICE ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species A (claim 18): wherein the test cell culture and the control cell culture comprise at least two different cell types, or

Species B (Claim 19): wherein the cells are primary cells.

The species are independent or distinct because species A is drawn to cells that comprise at least two different cell types, whereas species B, in contrast, requires that the cells are of a single type, i.e. primary cells.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 17 and 20-22 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1631

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
